An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The title of the invention has been changed to: "Light probe microscope including picture signal processing means".

The following is an examiner's statement of reasons for allowance: The prior art fails to teach a light probe microscope, among other features, comprising: a probe with a tip portion; position detecting means for controlling a distance between the tip and a sample; tremor means and control means; and a data collecting means, wherein a two dimensional image of the sample surface is obtained in real time by a two dimensional image sensor, and a two dimensional light image is obtained simultaneously with a shape image by the data collecting means by means of obtaining a signal intensity of an optical detection region in the two dimensional image by picture signal processing means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

I) Muramatsu et al 6,229,609 disclose a scanning microscope including means for controlling distance between a sample and a probe.
